

## Mobile Check-In

**Prior to utilizing the mobile check-in feature for Green Security, configure your phone by following the steps below:**

**For iOS:** There is a dedicated mobile app for iOS.

- Install the Green Security app from the Apple App Store.
- Verify the following settings are set:
  - Settings > Privacy > Location Services > On
  - Settings > Green Security > Location > “While Using the App”
  - Settings > Privacy > Location Services > Green Security > “While Using”

**For Android:** You can utilize mobile checkin by using your mobile browser.

- Go to your Android phone Settings > Location.
- Move the slider to “On”.

**When visiting the facility, utilize the mobile checkin using the following steps:**

- For iOS: Open the Green Security app. For Android: visit [greensecurityllc.com](http://greensecurityllc.com).
- Log-in.
- Choose Mobile Check-in from the menu.
- Allow the app to use your location.
- Click the “Check In” button beside the location which you’d like to visit.  
Your ability to check in at any particular facility is dependent on your location.
